### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

2. The application has been amended as follows:

#### **IN THE CLAIMS**

3. Previously Withdrawn **claims 6 and 7** have been rejoined as allowable claims now that the independent claim is allowable. The status identifier of claims 6 and 7 has been changed to --(Original)--.

4. The following is an examiner's statement of reasons for allowance: The closest prior art of record, Guth USP 6336636, has the first and second sealing surfaces bent with respect to each other such that only first sealing surface is in direct engagement with the rotating surface to establish a dynamic seal. Further, Guth cannot work if both portions were in direct contact with the rotating surface, as the first sealing portion/collar is also directly connected to the flexible annular support surface and the 2<sup>nd</sup> collar/sealing portion is at right angles.

5. The 112 rejection is overcome by applicant's definition from an accepted scientific source that rubber is a polymer.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
